REMARKS				
<p>I believe our experience with mission [REDACTED] of last Thursday is a good indication that we have a capability worthy of keeping under wraps. If we should reveal this capability to a now unwitting community we would have no further chance of conducting reconnaissance on a clandestine basis in the event the proposed plan should fail.</p> <p>Paragraph 2C is not clear. In one statement it is proposed that everything above 12 miles be international space. In the last statement of the para. it is stated that the Anglo-Saxon view is that ownership of real estate extends into the air to the extent the owner can reduce same to his immediate use.</p>
